DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/2/2008 has been entered.

Drawings

2. The drawings filed on 7/9/2004 have been entered and considered.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 29-31 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,15,28 of U.S. Patent No. 6,443,329 in view of Ballmann et al. 4,550,856.

Rocheft et al. in U.S. Patent No. 6,443,329 have taught all the features of the claimed invention except that the hanging support structure comprises at least one hanging aperture disposed in a wall of the tubular body. Ballmann et al. teach the use of a wall (40) of a tubular body with a hanging support structure (48), the hanging support structure having at least one hanging aperture (50).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize the teaching of Ballmann et al. onto the hanging support structure of Rocheft et al., in order to provide a convenient means for suspending the dispensing container from a hook or a horizontal pipe.

Response to Arguments

5. Applicant's arguments filed 5/2/2008 have been fully considered but are moot in view of the new ground(s) of rejection.
